- The role of media in fostering inclusion and combating racial intolerance (conference)

The workshop is the last of a series of three media literacy workshops organised as part of the 'Media Against Hate Speech' campaign with the aim of supporting:

- Mutual learning and cooperation activities as instruments for sharing concrete best practices transferable to different legal contexts, that are likely to increase efficient prevention of discrimination/hate speech
- Development of counter-narratives through multilingual programs / campaigns fighting stereotypes and populism, taking creative examples from a local/small scale to a broader context

The Community Media Forum Europe (CMFE) was founded to strengthen the participation of the "Third Media Sector" in European discussion and decision-making processes at a moment when freedom of expression and free access to information are increasingly endangered by the consequences of concentration in the media field.

The workshop is part of [#MediaAgainstHate](#), a Europe-wide campaign led by the European Federation of Journalists and a coalition of civil society organisations. The Media Diversity Institute (MDI) is one of the partners in the project Media against Hate. Other partners involved are: Article 19, Community Media Forum Europe (CMFE), Community Media Institute (COMMIT), Croatian Journalists' Association (CJA) and Cooperazione per lo Sviluppo dei Paesi Emergenti (COSPE). The project is financially supported by the European Commission (DG Justice and Consumers).
